Scope of environmental management system in JhP

JhP is a production plant for Common Rail Diesel Injection Systems within the Bosch Group providing products for the automotive industry.

Within the Bosch Group, there are no requirements for customer service and maintenance, on the JhP.

The range of the system is determined by ISO 14001

- for all three parts of plant Bosch Diesel Jihlava, Inc. (JhP1 – Humpolecká, JhP 2 – Na Dolech, plant 3 – Pávov)
- for all activities carried out in these plants
- for all products produced in JhP, product design and development of products Rail (high-pressure accumulator) and PLV (pressure limit valve) are included, for design and development of other products is responsible Robert Bosch GmbH (Wernerstraße 51 - 70469 Stuttgart-Feuerbach - Germany)
- for all JhP employees
- the requirements are not applicable for securing externally supplied products and services - externally supplied products and services are ensured by central purchasing (CP)
