# Scope of EMS and OHSMS in JhP

JhP is a production plant for Powertrain Systems within the Bosch Group, providing products for industrial applications. Within the Bosch Group, there are no requirements for customer service or maintenance activities at JhP.

The scope of the system is determined by ISO 14001:2015 and ISO 45001:2018

- for all four Bosch Powertrain s.r.o. sites
- for all activities carried out in these Bosch Powertrain s.r.o. plants
- for all products produced in JhP, the product design and development of Rail (high-pressure accumulator), PLV (pressure limit valve) and FRL (fuel return line) are included. Robert Bosch GmbH (Wernerstraße 51, 70469 Stuttgart-Feuerbach, Germany) is responsible for the design and development of the other products
- for all JhP employees
- these requirements are not applicable to securing externally supplied products and services; externally supplied products and services are ensured by Central Purchasing (CP)
